July 2018
Letter from Grant Administrator

The Municipal Park Grant Commission was created by State Statute and is responsible for distributing tax revenues to municipalities in St. Louis County for the purpose of creating, improving, or expanding park and recreation facilities or programs.

The Commission is made up of a nine member board; 7 voting members and two non-voting members. The seven voting members are representatives of the St. Louis County Council districts. The mayors/village chairpersons of each council district meet as independent groups and select their representative; commissioners cannot be municipal officials. The two non-voting members are designated in the statutes as a city administrator/manager and the Chairman of the Park Advisory Committee, who is a park professional.

The funds overseen by the Commission are generated by the passage of two propositions supporting regional parks of which the Commission receive a calculated portion. The first was a 1/10 cent sales tax approved 2000 and the second was a 3/16 cent sales tax approved in 2013. It has been the goal of the Commission to keep administrative cost as low as possible in order to make the most of the taxpayer dollars. In the 2017 grant round, \$7,418,135 was awarded to 20 municipalities and the administrative cost were less than \$100,000; meaning 98.9% of the tax dollars were re-invested in municipal park capital improvement projects. In addition, there was a special grant round for a project of regional significance. \$978,800 was awarded to Fenton, Kirkwood and Sunset Hills for work on a bicycle and pedestrian bridge on I-44 over the Meramec River. This is in conjunction with funds from MoDOT, St. Louis County and Great Rivers Greenway.

In 2016-17, the Commission invested \$5,000 in a new server in partnership with the Municipal League of Metro St. Louis. A new website was launched in early 2017 and the Round 18 was the first year for an online application process designed to streamline the application process. Round 19 and subsequent rounds will continue using the online application for construction and planning grants.

The Commission also approved making the planning grants available year round in order to make the process more convenient for the municipalities.

The Commission appreciates the input and cooperation received from the municipalities in making this grant program successful by providing a variety of quality park and recreational facilities available to the residents of St. Louis County. We are extremely proud of the work we all do together. Please share this report with other officials and citizens in your municipality.

Sincerely,

Pat Kelly
Grant Administrator
