Letter from Grant Administrator

The Municipal Park Grant Commission was created by State Statute and is responsible for distributing tax revenues to municipalities in St. Louis County for the purpose of creating, improving, or expanding park and recreation facilities or programs.

The Commission is made up of a nine-member board - 7 voting members and two non-voting members. The seven voting members are representatives of the St. Louis County Council districts. The mayors/village chairpersons of each council district meet as independent groups and select their representative. Commissioners cannot be municipal officials. The two non-voting members are designated in the statutes as a city administrator/manager and the Chairman of the Park Advisory Committee, who is a park professional.

The funds overseen by the Commission are generated by the passage of two propositions supporting regional parks of which the Commission receives a calculated portion. The first was a 1/10 cent sales tax approved 2000 and the second was a 3/16 cent sales tax approved in 2013. It has been the goal of the Commission to keep administrative costs as low as possible in order to make the most of the taxpayer dollars. In the 2020 grant round, \$6,538,884 was awarded to 18 municipalities and the administrative costs were less than \$100,000; meaning 99% of the tax dollars were re-invested in municipal park capital improvement projects. The grants awarded were lower than previous years due to the impact of the Covid-19 pandemic on sales tax revenues.

In 2016-17, the Commission invested \$5,000 in a new server in partnership with the Municipal League of Metro St. Louis. A new website was launched in early 2017 and Round 18 was the first year for an online application format designed to streamline the process. Subsequent rounds will continue using the online application for construction and planning grants.

The Commission also approved making planning grants available year-round in order to make the process more convenient for the municipalities.

The Commission appreciates the input and cooperation received from the municipalities in making this grant program successful by providing a variety of quality park and recreational facilities available to the residents of St. Louis County. We are extremely proud of the work we all do together. Please share this report with other officials and citizens in your municipality.

Sincerely,

Pat Kelly  
Grant Administrator
